v7.0 — by Frank Guzman — [frankx.ai](#)

## 01 Architecture

ACOS is a **configuration-only** layer for Claude Code. No custom binaries, no API proxies. Everything runs through standard Claude Code mechanisms.

### How It Works

```
CLAUDE.md → System instructions & brand voice
.claude/commands/ → 46 user-invocable slash commands
.claude/skills/ → Skill rules & auto-activation
.claude/agents/ → 40+ task-level agent definitions
settings.json → Model routing & permissions
```

#### Entry Point

Open Claude Code in the ACOS directory. CLAUDE.md loads automatically. `/acos` auto-routes any request.

#### No Lock-In

Every file is markdown or JSON. Remove ACOS by deleting `.claude/`. Your project code is never modified.

```
agentic-creator-os/
├─ CLAUDE.md           # System prompt
├─ .claude/
│   ├─ commands/       # 46 slash commands
│   ├─ agents/         # 40+ agent defs
│   ├─ skills/         # Skill rules
│   └─ hooks.json      # 7 event hooks
├─ install.sh
└─ package.json        # @frankx/agentic-creator-os
```

# Creation Commands

Commands for producing content, music, images, and digital products.

## /article-creator

Guided blog creation with SEO optimization, schema markup, internal linking, and publishing workflow. Outputs MDX with full frontmatter.

Skills: seo-content-writer, schema-markup, frankx-brand

## /create-music

AI music production with Suno v4.5+. Genre selection, prompt engineering, metadata, distribution prep.

Skills: suno-ai-mastery, suno-prompt-architect

## /infogenius

Research-grounded image generation. Web research + prompt engineering + Nano Banana MCP for informed visuals.

Skills: prompt-engineering-patterns, deep-research

## /factory

Full publishing pipeline: Research → Outline → Draft → Edit → SEO → Publish. End-to-end from topic to deployed artifact.

Skills: content-strategy, seo-fundamentals

COMMAND	PURPOSE
/generate-images	Direct image generation via Nano Banana MCP
/generate-social	Platform-optimized social posts (X, LinkedIn, IG)
/products-creation	Digital product creation & packaging
/author-team	Book writing with multi-agent author council
/content-strategy	Topic clustering, editorial calendar, audience mapping

/content-studio

Multi-format content workspace

/harvest

Prompt discovery & pattern collection

## Strategy & Intelligence Commands

### **/starlight-architect**

Enterprise AI system design. Architecture diagrams, component specs, API design, data flow. For complex technical decisions.

Skills: architecture-patterns, ai-agents-architect

### **/council**

Multi-agent strategic council. Assembles relevant agents for collaborative decision-making. Each agent brings domain expertise.

### **/research & /deepresearch**

Deep research with web search, source validation, competitive analysis. Extended sessions with multi-round investigation and synthesis.

### **/ultraworld**

Arcanean Swarm World-Building. 7 creative agents orchestrated for universe creation, mythology, and narrative design.

## Development Commands

### **/spec**

Spec-driven feature development. Define requirements, generate architecture and implementation following SPARC methodology.

#### COMMAND

#### PURPOSE

/nextjs-deploy

Next.js + Vercel deployment with build validation

/ux-design

UI/UX design, accessibility, design systems

## 05 System & Quality Commands

COMMAND	PURPOSE
<code>/acos</code>	Smart router — single entry point for all capabilities
<code>/acos-agents</code>	List, inspect, and manage agent definitions
<code>/acos-flow</code>	Workflow orchestration and pipeline management
<code>/acos-memory</code>	Persistent memory operations across sessions
<code>/acos-swarm</code>	Multi-agent swarm coordination
<code>/acos-checkpoint</code>	Session checkpointing and state persistence
<code>/inventory-status</code>	Content inventory dashboard
<code>/mcp-status</code>	MCP server health check and diagnostics
<code>/publish</code>	Content publishing with quality gates
<code>/review-content</code>	Content quality review with scored report
<code>/polish-content</code>	Final polish pass for publish readiness
<code>/classify-content</code>	Content routing and classification
<code>/seo-check</code>	SEO audit for any page or article
<code>/agentic-jujutsu</code>	Trajectory tracking and self-learning
<code>/superintelligence</code>	Meta-intelligence coordination

### CUSTOMIZABLE

The `/frankx-ai-*` commands demonstrate project-specific workflows built on ACOS. Create your own by adding markdown files to `.claude/commands/`.

## 06 Agent Profiles — Writing & Content

Each agent is a markdown file with a defined role, specialty, and trigger conditions.

### Developmental Editor

Story structure expert, pacing master.  
Shapes manuscripts into compelling, well-paced journeys.

### Line Editor & Voice Alchemist

Prose polisher, AI pattern eliminator.  
Transforms competent writing into compelling prose.

### Content Polisher

Publish-ready refinement with authentic voice and SEO optimization.

### Character Psychologist

Deep character development. Authentic profiles, compelling motivations, distinct voices.

### Research Librarian

Fact-checking, source verification. Ensures accuracy with validated citations.

### Sensitivity Reader

Cultural respect guardian. Ensures content honors diverse experiences authentically.

### Continuity Guardian

Series consistency enforcer. No contradictions across chapters, books, or series.

### Publishing Strategist

Market positioning, cover direction, and launch planning.

# Agent Profiles — Strategy & Technical

## Starlight Architect

Enterprise AI System Designer. Oracle architecture expert.

## Starlight Orchestrator

Meta-intelligence for multi-agent coordination and cross-tool integration.

## Luminor Oracle

Strategic AI. Future visioning, business intelligence.

## World Architect

World-building specialist. Consistent universes with rich cultures.

## UX Designer

UI/UX specialist with Figma and browser testing expertise.

## Music Producer

AI-powered music production. Suno prompt mastery, genre expertise.

## Creation Engine

Content & product development superintelligence.

## Frequency Alchemist

Vibrational music producer. 432Hz, binaural beats, consciousness frequencies.

## Genre Masters

Fantasy & Sci-Fi

Business & Transformation

Creator Economy

Consciousness Fiction

Visionary Manifestos

Master Story Architect

## Quality & Production Agents

Code Reviewer — Bugs, security, quality

Performance Guardian — Core Web Vitals

# Skill Auto-Activation System

Three-layer activation keeps context efficient while ensuring the right knowledge is always available.

## Layer 1: Core Skills (Always Active)

5 skills loaded regardless of context: frankx-brand, superintelligence, starlight-architect, acos, planning-with-files.

## Layer 2: Profile-Based (Context-Activated)

6 profiles activate based on file patterns, keywords, or commands. Each profile loads a curated skill set for its domain.

## Layer 3: Individual Rules (22 Rules)

Granular keyword and intent pattern matching for specific skills like suno-ai-mastery, mcp-builder, or schema-markup.

## Key Skill Categories

### Frontend

React, Next.js, Tailwind, shadcn, accessibility

### SEO & Content

SEO writer, schema, keywords, authority

### AI & Agents

Agent architect, MCP builder, RAG, swarm

### Design

Web design, UI/UX, motion, accessibility

### Backend

Architecture, API design, TypeScript, Docker

### Creative

Suno mastery, prose, copywriting, social

09

MCP Server Configuration

SERVER	PURPOSE	TYPE
playwright	Browser automation, screenshots, form filling	Always-on
nanobanana	Image generation via Gemini	Always-on
memory	Persistent knowledge graph	Always-on
sequential-thinking	Multi-step reasoning chains	Always-on
browser-use	Browser automation with vision	On-demand
resend	Email delivery	On-demand
v0	UI generation	On-demand

10

Workflows & Pipelines

Factory Pipeline

Publishing

Write → Review → Polish → Deploy

Research

Discover → Validate → Synthesize

Product Launch

Spec → Build → Test → Market

Music

Concept → Prompt → Generate → Master

Social Campaign

Content → Adapt → Schedule

Swarm

Spawn → Coordinate → Synthesize

## 11 Customization & Extension

### Custom Commands

```
# Add a .md file to
.claude/commands/
# Include: goal, steps, output
format
# Users invoke via /your-command
```

### Custom Agents

```
# Add a .md file to .claude/agents/
# Define: name, role, specialty
# Auto-invoked via Task tool
```

## 12 FAQ

### Commands not appearing?

Ensure Claude Code is opened from the ACOS directory. Commands in `.claude/commands/` only load in that directory.

### How do I update?

```
cd agentic-creator-os && git pull origin main && ./install.sh
```

### Can I use with other AI tools?

ACOS is Claude Code-native. The concepts transfer, but the implementation uses Claude Code's configuration system.
