How to Use This Guide

Each prompt below is the actual text I used in Suno to create my top-performing tracks. For each one:

- **The Prompt** — copy it directly into Suno's "Song Description" field
- **Why It Works** — the specific elements that produce good output
- **Variations** — tweak these parameters to explore different directions

> **Tip:** Set Suno to v4 or higher for best results. Longer, more descriptive prompts consistently outperform short ones.

Prompt 1

THE TOP PERFORMER

The Awakening

142 plays · 20 likes · African / World / Cinematic

PROMPT

```
African, 10 female vocalists, drums, powerful, cinematic, consciousness,
natural, world music, tribal drums, layered female choir, call and response,
dramatic build, soul-stirring, rhythmic percussion, organic, raw energy
```

WHY IT WORKS

- **"10 female vocalists"** — Suno interprets this as dense layered vocals, creating rich choral texture
- **"Call and response"** — triggers antiphonal structure (lead voice, then group response)
- **"Dramatic build"** — signals song structure: quiet start, powerful climax
- **"Tribal drums"** — produces organic percussion instead of electronic beats

VARIATIONS TO TRY

- Swap "African" for "Mongolian" or "Celtic" for different world music flavors
- Replace "10 female vocalists" with "male baritone choir" for a deeper register

- Add "432Hz" or "528Hz" for healing frequency tuning

Prompt 2

Vibe O S

128 plays · 24 likes · Hip Hop / Bass

PROMPT

```
Female hip hop, bass-heavy, lyrical, sophisticated, violin, electric guitar,
808 sub bass, confident female vocalist, clever wordplay, cinematic strings,
modern trap production, polished, radio-ready, 4 minutes
```

WHY IT WORKS

- **"Sophisticated"** — one of the most powerful Suno keywords. Elevates vocabulary, melody, and production

- **"Violin" + "electric guitar"** — hybrid instrumentation blends classical with modern

- **"808 sub bass"** — double emphasis with "bass-heavy" ensures deep low-end

- **"4 minutes"** — explicitly requesting longer duration (default ~2 min)

VARIATIONS TO TRY

- Replace "female" with "male" or "duet" for different vocal arrangements

- Add "jazz chords" or "neo-soul" for a smoother feel

- Swap "trap production" for "boom bap" for classic hip hop texture

Prompt 3

Golden Age of Intelligence

119 plays · 20 likes · EDM / Metalcore / Hip Hop

```
EDM hit, metalcore, sophisticated hip hop, female duet, electric guitar,
festival anthem, massive drop, stadium energy, heavy breakdown, soaring
vocals, electronic meets metal, high production value, radio edit
```

WHY IT WORKS

- **3-genre fusion** — combining EDM + metalcore + hip hop forces Suno into creative territory

- **"Massive drop" + "heavy breakdown"** — structural keywords give the song clear peak moments

- **"Festival anthem" + "stadium energy"** — context words set the scale of production

Prompt 4

Lumina

108 plays · 16 likes · Rock / Soul / Orchestral

Arcanean rock, female choir soul, violins, high energy soul, Dolby Atmos remastered, cinematic, orchestral, natural, dramatic, sophisticated, uplifting epic feminine beauty extraordinary high notes, cinematic choir, head voice dramatic soprano vocal mastery, female vocals

WHY IT WORKS

- **"Dolby Atmos remastered"** — signals "premium, wide, immersive" mixing quality
- **"Head voice dramatic soprano vocal mastery"** — stacking vocal descriptors forces impressive singing
- **"Arcanean rock"** — invented genres push Suno into creative interpretation

VARIATIONS TO TRY

- Replace "Arcanean" with any invented word to create your own genre
- Add "IMAX, THX" as additional production quality signals
- Try "male tenor" or "countertenor" to change gender but keep high range

Prompt 5

Trust in Yourself

77 plays · 34 likes · Pop Punk / Symphonic

Pop punk, symphonic, male vocals, female chorus, heavy 808 bass, electric
guitar solo, motivational, anthemic, sing-along chorus, energetic, uplifting
message, stadium rock meets pop punk, powerful drums

WHY IT WORKS

- **"Male vocals, female chorus"** — contrast creates commercial-sounding production

- **"Sing-along chorus"** — tells Suno to make it catchy and repetitive

- **"Stadium rock meets pop punk"** — genre fusion that feels both massive and personal

- **"Motivational, anthemic"** — emotional direction words shape lyric content

Power Words Cheat Sheet

Use these keywords to level up any Suno prompt. Stack multiple categories for best results.

CATEGORY	KEYWORDS
Quality	sophisticated, polished, radio-ready, high production value, remastered
Emotion	dramatic, uplifting, haunting, euphoric, melancholic, triumphant
Structure	build, drop, breakdown, bridge, outro, verse-chorus-verse
Vocals	belting, head voice, whisper, choir, layered harmonies, call and response
Production	Dolby Atmos, THX, cinematic, spatial, wide stereo

Common Mistakes

- **Too vague:** "Make a good song" gives Suno no direction. Be specific about genre, instruments, and mood.

- **Too short:** Single-word genres produce generic results. Stack descriptors.

- **Contradictions:** "Calm, aggressive" confuses the model. Pick one emotional direction.

- **Ignoring duration:** Default is ~2 min. Add "3 minutes" or "4 minutes" for longer tracks.
