

// PROMPT ENGINEERING

Top 50 Production AI Prompts for Creators & Architects

Battle-tested prompts for coding, content expansion, strategy, and automated research

TARGET AUDIENCE

All Creators, Engineers, & Digital Solopreneurs

STANDARD

FrankX Sovereign Quality Pass

YEAR OF RELEASE

2026 Sovereign Edition

ECOSYSTEM

Agentic Creator OS (ACOS)

Executive Summary & System Architecture

50 copy-paste production prompts used daily across the FrankX and Starlight agent fleets. Categorized across Software Architecture, Executive Copywriting, Deep Research Synthesis, and Image/Audio direction.

The Sovereign Core Principle: In the Agentic Era, leverage is no longer determined by the size of your team, but by the architecture of your autonomous constraints and multi-agent coordination loops.

Core Framework Pillars

Category 1: Code Generation & Architecture Prompts

Includes prompts for Test-Driven Development loops, AST refactoring, API schema extraction, and Next.js / TypeScript edge route hardening.

Category 2: Executive Synthesis & Research Scouting

Prompts designed to ingest 100-page whitepapers, extract tabular comparative metrics, identify hidden technical trade-offs, and output actionable decision matrices.

Category 3: Multi-Format Content Atomization

Turn a single raw voice memo or code walkthrough into a long-form article, 5-tweet thread, email newsletter issue, and LinkedIn executive carousel.

Production Implementation Protocols

Follow this step-by-step execution matrix to integrate these frameworks into your live production environment:

- ✓ **Step 1: Constraint Calibration** — Establish negative-constraint vocabulary and security perimeter.
- ✓ **Step 2: Dual-Layer Memory Integration** — Wire ephemeral state buffers into persistent vector memory.
- ✓ **Step 3: Multi-Pass Orchestration** — Separate raw generation from deterministic schema verification.
- ✓ **Step 4: Automated Quality Gating** — Enforce pre-commit type check, link audit, and AI-slop refusal rules.

Production Prompt Recipe

```
Analyze the provided component for: (1) Re-render bottlenecks, (2) Missing TypeScript strict types, (3) WCAG AA accessibility compliance. Return only the refactored code with inline comments explaining architectural optimizations.
```

Sovereign Quality Verification Gate

Before deploying any artifact to public-facing channels, verify adherence to the FrankX 5-Gate Integrity Standard:

- ✓ **Gate 1 (Voice & Brand):** Direct, technical, results-first. No spiritual guru claims or hyperbolic buzzwords.
- ✓ **Gate 2 (Anti-Slop Audit):** Strict refusal list checked. Zero instances of "delve", "tapestry", or "testament".
- ✓ **Gate 3 (Code & Schema Integrity):** Strict TypeScript types, verified JSON schemas, and zero broken links.
- ✓ **Gate 4 (Execution Readiness):** Immediate copy-paste utility for the practitioner without missing dependencies.

Ready to Scale with Autonomous Agent Swarms?

This handbook is the foundational Layer 0 of the FrankX Sovereign Value Ladder. For full production codebases, multi-agent swarms, and 1-on-1 architecture sprints:

- **Tier 1 (€97): The ACOS Starter Bundle & 500+ Prompt Vault**
- **Tier 2 (€297): Autonomous Agent Swarm Engineering Suite**
- **Tier 3 (€997): Sovereign Creator Enterprise Engine**
- **Tier 4 (€2,997): 3-Week Private AI Architecture Sprint with Frank**

Visit frankx.ai/products/value-ladder to explore the complete ecosystem.
