
FRANKX · PROMPT ENGINEERING

The Top 50 Production AI Prompts for Creators & Architects

Battle-tested prompts for coding, content expansion, strategy, and automated research

Frank Riemer · frankx.ai · 2026

Top 50 AI Prompts Collection

Battle-tested prompts refined through daily use across ChatGPT, Claude, Midjourney, and Suno.
Copy, paste, adapt.

How to Use This Collection

Each prompt is designed to be immediately usable. Replace the bracketed text with your specifics:

- [topic] = Your subject
 - [style] = Your preferred approach
 - [context] = Relevant background
-

Part 1: Writing & Content (10 Prompts)

1. Blog Post Draft

Write a blog post about [topic].

Structure:

- Hook that creates tension or curiosity (2 sentences)
- Why this matters now (1 paragraph)
- Main insight with 3 supporting points
- Practical next steps
- Call to action

Tone: Conversational but authoritative

Length: 800-1000 words

2. Email Sequence

Create a 5-email sequence for [product/service].

Email 1: Problem awareness

Email 2: Introduce solution

Email 3: Social proof and results

Email 4: Objection handling

Email 5: Final offer with urgency

Each email: 150-200 words, one clear CTA

3. LinkedIn Post

Write a LinkedIn post about [lesson/insight].

Format:

- Hook line that stops scrolling
- Story or observation (3-4 short lines)
- The insight (1 line, bold-worthy)
- 2-3 practical takeaways
- Question to encourage comments

Keep each line under 10 words for mobile readability.

4. Newsletter Edition

Write a newsletter edition about [topic].

Structure:

- Quick personal opener (2 sentences)
- Main insight of the week
- 3 bullet points expanding on it
- One actionable tip
- Resource or tool recommendation
- Sign-off with preview of next week

Tone: Like writing to a smart friend

Length: 400-500 words

5. YouTube Script

Write a YouTube script about [topic].

Structure:

- Hook (first 5 seconds, create curiosity)
- Preview (what they'll learn)
- Main content (3-5 key points with examples)
- Summary (what they now know)
- CTA (subscribe, watch next video)

Speaking time: [X] minutes

Include timestamps for each section.

6. Product Description

Write a product description for [product].

Include:

- One-line value proposition
- 3 key benefits (not features)
- Who this is perfect for
- What makes it different
- Social proof element
- Clear CTA

Length: 150-200 words

Avoid: Superlatives without proof

7. Case Study Outline

Create a case study outline for [client/project].

Structure:

- Challenge: What problem they faced
- Solution: What we did (specific steps)
- Results: Measurable outcomes
- Quote: Client testimonial
- Learnings: What made this work

Include specific numbers and timelines.

8. Thread/Twitter Post

Write a thread about [topic].

Tweet 1: Bold hook/claim

Tweets 2-6: One point per tweet with example

Tweet 7: Summary of key points

Tweet 8: CTA or question

Each tweet: Max 280 characters

Use line breaks for readability.

9. Headline Generator

Generate 10 headlines for an article about [topic].

Mix of formats:

- 3 "How to" headlines
- 2 List headlines (X ways, X mistakes)
- 2 Question headlines
- 2 Contrarian/surprising headlines
- 1 Curiosity gap headline

Target audience: [audience]

10. Content Repurposing

Repurpose this content for multiple platforms:

[paste original content]

Create:

1. LinkedIn post version
2. Twitter thread (5 tweets)
3. Instagram carousel outline (8 slides)
4. Email newsletter version
5. 60-second video script

Maintain core message across all versions.

Part 2: Coding & Development (10 Prompts)

11. Code Review

Review this code for:

- Security vulnerabilities
- Performance issues
- Code style/readability
- Potential bugs
- Suggested improvements

[paste code]

Prioritize issues by severity.

12. Refactor Request

Refactor this code to be more:

- Readable
- Maintainable

- Efficient

[paste code]

Explain each change and why it improves the code.

Don't change the public API.

13. Debug Assistant

This code produces [unexpected behavior]:

[paste code]

Expected: [what should happen]

Actual: [what happens instead]

Error message (if any): [paste error]

Find the bug and explain the fix.

14. API Design

Design a REST API for [feature/system].

Include:

- Endpoints (method, path, description)
- Request/response schemas
- Authentication approach
- Error handling patterns
- Pagination strategy

Follow RESTful conventions.

15. Database Schema

Design a database schema for [application/feature].

Requirements:

[list requirements]

Include:

- Table definitions with types
- Primary and foreign keys
- Indexes for common queries
- Relationship diagram description

16. Test Generation

Write tests for this function:

[paste function]

Include:

- Happy path tests
- Edge cases
- Error handling tests
- Input validation tests

Use [testing framework] format.

17. Documentation

Write documentation for this code:

[paste code]

Include:

- Overview: What it does
- Installation/setup
- Usage examples

- API reference
- Common issues/FAQ

18. Performance Optimization

Optimize this code for performance:

[paste code]

Current bottleneck: [describe issue]

Target improvement: [goal]

Suggest optimizations with expected impact.

19. Code Explanation

Explain this code to a [junior/senior] developer:

[paste code]

Cover:

- What it does (high level)
- How it works (step by step)
- Key concepts used
- Why it's written this way

20. Architecture Design

Design the architecture for [system/feature].

Requirements:

[list requirements]

Include:

- Component diagram

- Data flow
- Technology choices with justification
- Scalability considerations
- Trade-offs made

Part 3: Image Generation (10 Prompts)

21. Product Photography

[Product type] product photography,
studio lighting with soft shadows,
white seamless background,
8k resolution, professional commercial quality,
Canon EOS R5, 85mm lens, f/2.8

22. Hero Image

Abstract digital art for website hero section,
[color palette] gradient,
flowing organic shapes,
subtle particle effects,
dark background,
futuristic and premium feel,
16:9 aspect ratio

23. Social Media Graphic

Bold typographic design,
"[Your text here]" as main element,
[color] color scheme,
modern sans-serif font,
minimalist composition,
Instagram story format 9:16

24. Portrait Style

Professional headshot,
[person description],
warm studio lighting,
blurred background,
confident expression,
business casual attire,
shot on Sony A7III

25. Landscape Art

Cinematic landscape,
[setting description],
golden hour lighting,
dramatic clouds,
8k resolution,
Ansel Adams style composition,
high dynamic range

26. Logo Concept

Minimalist logo design,
[brand name or concept],
single color on white background,
geometric shapes,
modern and timeless,
scalable vector style,
negative space use

27. Illustration Style

Digital illustration,
[subject],
[style reference] art style,

vibrant colors,
clean lines,
character design,
concept art quality

28. Tech/UI Mockup

Modern app interface mockup,
[feature description],
dark mode aesthetic,
glassmorphism elements,
subtle gradients,
floating on minimal background,
4k resolution

29. Album Cover

Album artwork for [genre] music,
[mood/theme description],
artistic and evocative,
square format,
bold colors,
[specific visual elements],
record label quality

30. Book Cover

Book cover design,
title: "[book title]",
genre: [genre],
[visual theme description],
professional typography,
engaging composition,
bestseller aesthetic

Part 4: Music Creation (10 Prompts)

31. Cinematic Epic

Cinematic orchestral, epic and triumphant,
full symphony with brass crescendo,
building tension to climax,
war drums in final section,
Hans Zimmer style production

32. Lo-Fi Chill

Lo-fi hip hop, nostalgic and warm,
vinyl crackle and tape saturation,
mellow jazz piano chords,
boom bap drums,
late night study session vibe

33. Ambient Meditation

Ambient meditation, ethereal and peaceful,
soft synthesizer pads,
nature sounds subtle in background,
432 Hz healing frequency,
60 BPM, minimal drums

34. Electronic Dance

Progressive house, euphoric and driving,
synthesizer arpeggios,
four on the floor kick,
side-chain compression,
festival main stage energy,
128 BPM

35. Acoustic Folk

Indie folk, intimate and raw,
acoustic guitar fingerpicking,
warm male/female vocals,
subtle harmonies,
campfire atmosphere,
authentic and heartfelt

36. Synthwave Retro

Synthwave, nostalgic 80s,
analog synthesizers,
pulsing bass line,
gated reverb drums,
neon-lit nightscape,
Blade Runner atmosphere

37. Jazz Fusion

Modern jazz fusion,
complex chord progressions,
electric piano and bass groove,
sophisticated drums,
Miles Davis meets Herbie Hancock,
smoky club atmosphere

38. Orchestral Trailer

Trailer music, intense and building,
percussion-driven rhythm,
staccato strings,
brass stabs,

countdown to epic drop,
Hollywood blockbuster quality

39. Pop Production

Contemporary pop, radio-ready,
catchy hook-driven melody,
polished production,
verse-chorus-verse structure,
modern mixing,
chart-topping energy

40. World Music Fusion

World music fusion,
[culture] traditional instruments,
modern electronic production,
rhythmic complexity,
global dance music,
respectful cultural blend

Part 5: Business & Productivity (10 Prompts)

41. Meeting Summary

Summarize this meeting transcript:
[paste transcript]

Include:

- Key decisions made
- Action items (who, what, when)
- Open questions
- Next steps

Format as bullet points.

42. Strategy Analysis

Analyze this strategy/decision:

[paste strategy or describe decision]

Consider:

- Strengths of approach
- Potential risks
- Alternative options
- Resource requirements
- Success metrics

Provide recommendation.

43. Competitive Analysis

Analyze [competitor] compared to [our product].

Cover:

- Feature comparison
- Pricing strategy
- Target audience
- Marketing approach
- Strengths/weaknesses
- Opportunities for differentiation

44. Interview Prep

Prepare me for an interview at [company] for [role].

Generate:

- 10 likely questions they'll ask

- 5 questions I should ask them
- Key points to emphasize
- Potential red flags to avoid
- Salary negotiation talking points

45. Project Plan

Create a project plan for [project].

Timeline: [duration]

Team: [size/roles]

Include:

- Phase breakdown
- Key milestones
- Deliverables
- Dependencies
- Risk factors

46. Business Email

Write a professional email:

Purpose: [goal of email]

Recipient: [role/relationship]

Context: [relevant background]

Tone: [formal/friendly/urgent]

Keep under 150 words.

One clear ask.

47. Presentation Outline

Create a presentation outline about [topic].

Audience: [who]

Duration: [minutes]

Goal: [what they should do after]

Include:

- Opening hook
- Key points (3-5)
- Supporting data needed
- Anticipated questions
- Strong close

48. Process Documentation

Document this process:

[describe process]

Include:

- Step-by-step instructions
- Required tools/access
- Decision points
- Troubleshooting tips
- Quality checkpoints

49. Resume Optimizer

Optimize this resume section for [job title]:

Current version:

[paste section]

Target job requirements:

[paste key requirements]

Rewrite to:

- Match relevant keywords
- Quantify achievements

- Show impact
- Keep concise

50. Personal Development

Create a 90-day development plan for [skill/goal].

Current level: [where I am]

Target level: [where I want to be]

Include:

- Weekly milestones
- Daily actions (15-30 min)
- Resources to use
- Progress indicators
- Accountability methods

Quick Reference

Best Practices

1. **Be specific** - Vague prompts get vague results
2. **Set constraints** - Word limits, format requirements
3. **Provide context** - Who's the audience, what's the goal
4. **Iterate** - Use follow-up prompts to refine
5. **Combine** - Mix prompts for unique outputs

Model Selection

Task	Best Model
Writing	Claude, GPT-4
Code	Claude, GPT-4
Images	Midjourney, DALL-E 3

Task	Best Model
Music	Suno, Udio
Quick tasks	GPT-3.5, Haiku

Next Steps

1. Pick 5 prompts relevant to your work
 2. Customize them with your specifics
 3. Test and iterate
 4. Build your personal prompt library
 5. Explore the full [Prompt Library](#)
-

These 50 prompts represent daily use across projects. Each has been refined through iteration. Copy them, adapt them, make them yours.
